

VOICEOVER

1. PLS, Pacific Laser Systems, proudly presents the PLS 4 continuous line laser.
2. This precision laser combines horizontal/vertical axes with plumb points, replacing traditional layout methods for much faster on-site layouts.
3. A rugged, professional, and very affordable alignment tool, the PLS 4 is ideal for any builder who demands high precision in horizontal and vertical layouts, and checking plumb.
4. The PLS 4's crisp, bright laser beam is cross-line accurate to an eighth of an inch at 30 feet, and point-to-point accurate to a quarter inch at 100 feet.
5. Save time and money indoors or outdoors. Layout fixtures, cabinetry, walls, soffits and more.
6. Up and down points on the PLS 4 make it easy and fast to check plumb on doorways and windows, with two bright reference points.
